HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

OneWater FAIR Data Platform: setting up a national FAIR water data platform and community

28/09/2023 - TERENO-OZCAR conference

Sylvain Grellet (BRGM) & the OneWater Data Platform Team

OneWater
Eau Bien Commun

PEPR Exploratoire co-dirigé par
Agathe Euzen (CNRS), Dominique Darmendrail (BRGM), Thibault Datry (INRAE)

Context

⇒ OZCAR is not new here

Data available online

<https://in-situ.theia-land.fr>

- Data discovery through variables, climate, geology, funders
- 16/22 visible observatories

FAIR thesaurus

Variable / object of interest names

<https://w3id.org/ozcar-theia>

DOI : 10.17178/67b5a1d5-8c8c-4a94-a646-1cca1d0adf79

Context

What's new ?

- We are building a more integrated water environment for research & public organization monitoring data to be FAIR

- <https://www.onewater.fr/fr> , 10 years, 10 partners,
- 53 Million €
- “Programmes et Equipements Prioritaires de Recherche (PEPR) ” -> National Acceleration Strategy
- To contribute to accelerate transitions a measure impacts of global changes on socio-ecological systems through 6 scientific challenges

- Anticipation** of water resource availability (surface & ground) -> new sensors, models, forecast
- Footprint** holistic approach human pressures and their consequences on hydrosystems and aquatic ecosystem
- Sentinel** water as a environment health and human societies sentinel -> new approaches/methods/data/indicators
- Solutions** enhance water resource resilience in the context of global change, circular use, ...
- Socio-ecological transition** new governance modes/tools to protect water and elaborate public water policies with water as common
- Data sharing** FAIR Data / interoperability

- Anticipation** of water resource availability (surface & ground) -> new sensors, models, forecast
 - Footprint** holistic approach human pressures and their consequences on hydrosystems and aquatic ecosystem
 - Sentinel** water as a environment health and human societies sentinel -> new approaches/methods/data/indicators
 - Solutions** enhance water resource resilience in the context of global change, circular use, ...
 - Socio-ecological transition** new governance modes/tools to protect water and elaborate public water policies with water as common
 - Data sharing** FAIR Data / interoperability
- ★ We are here

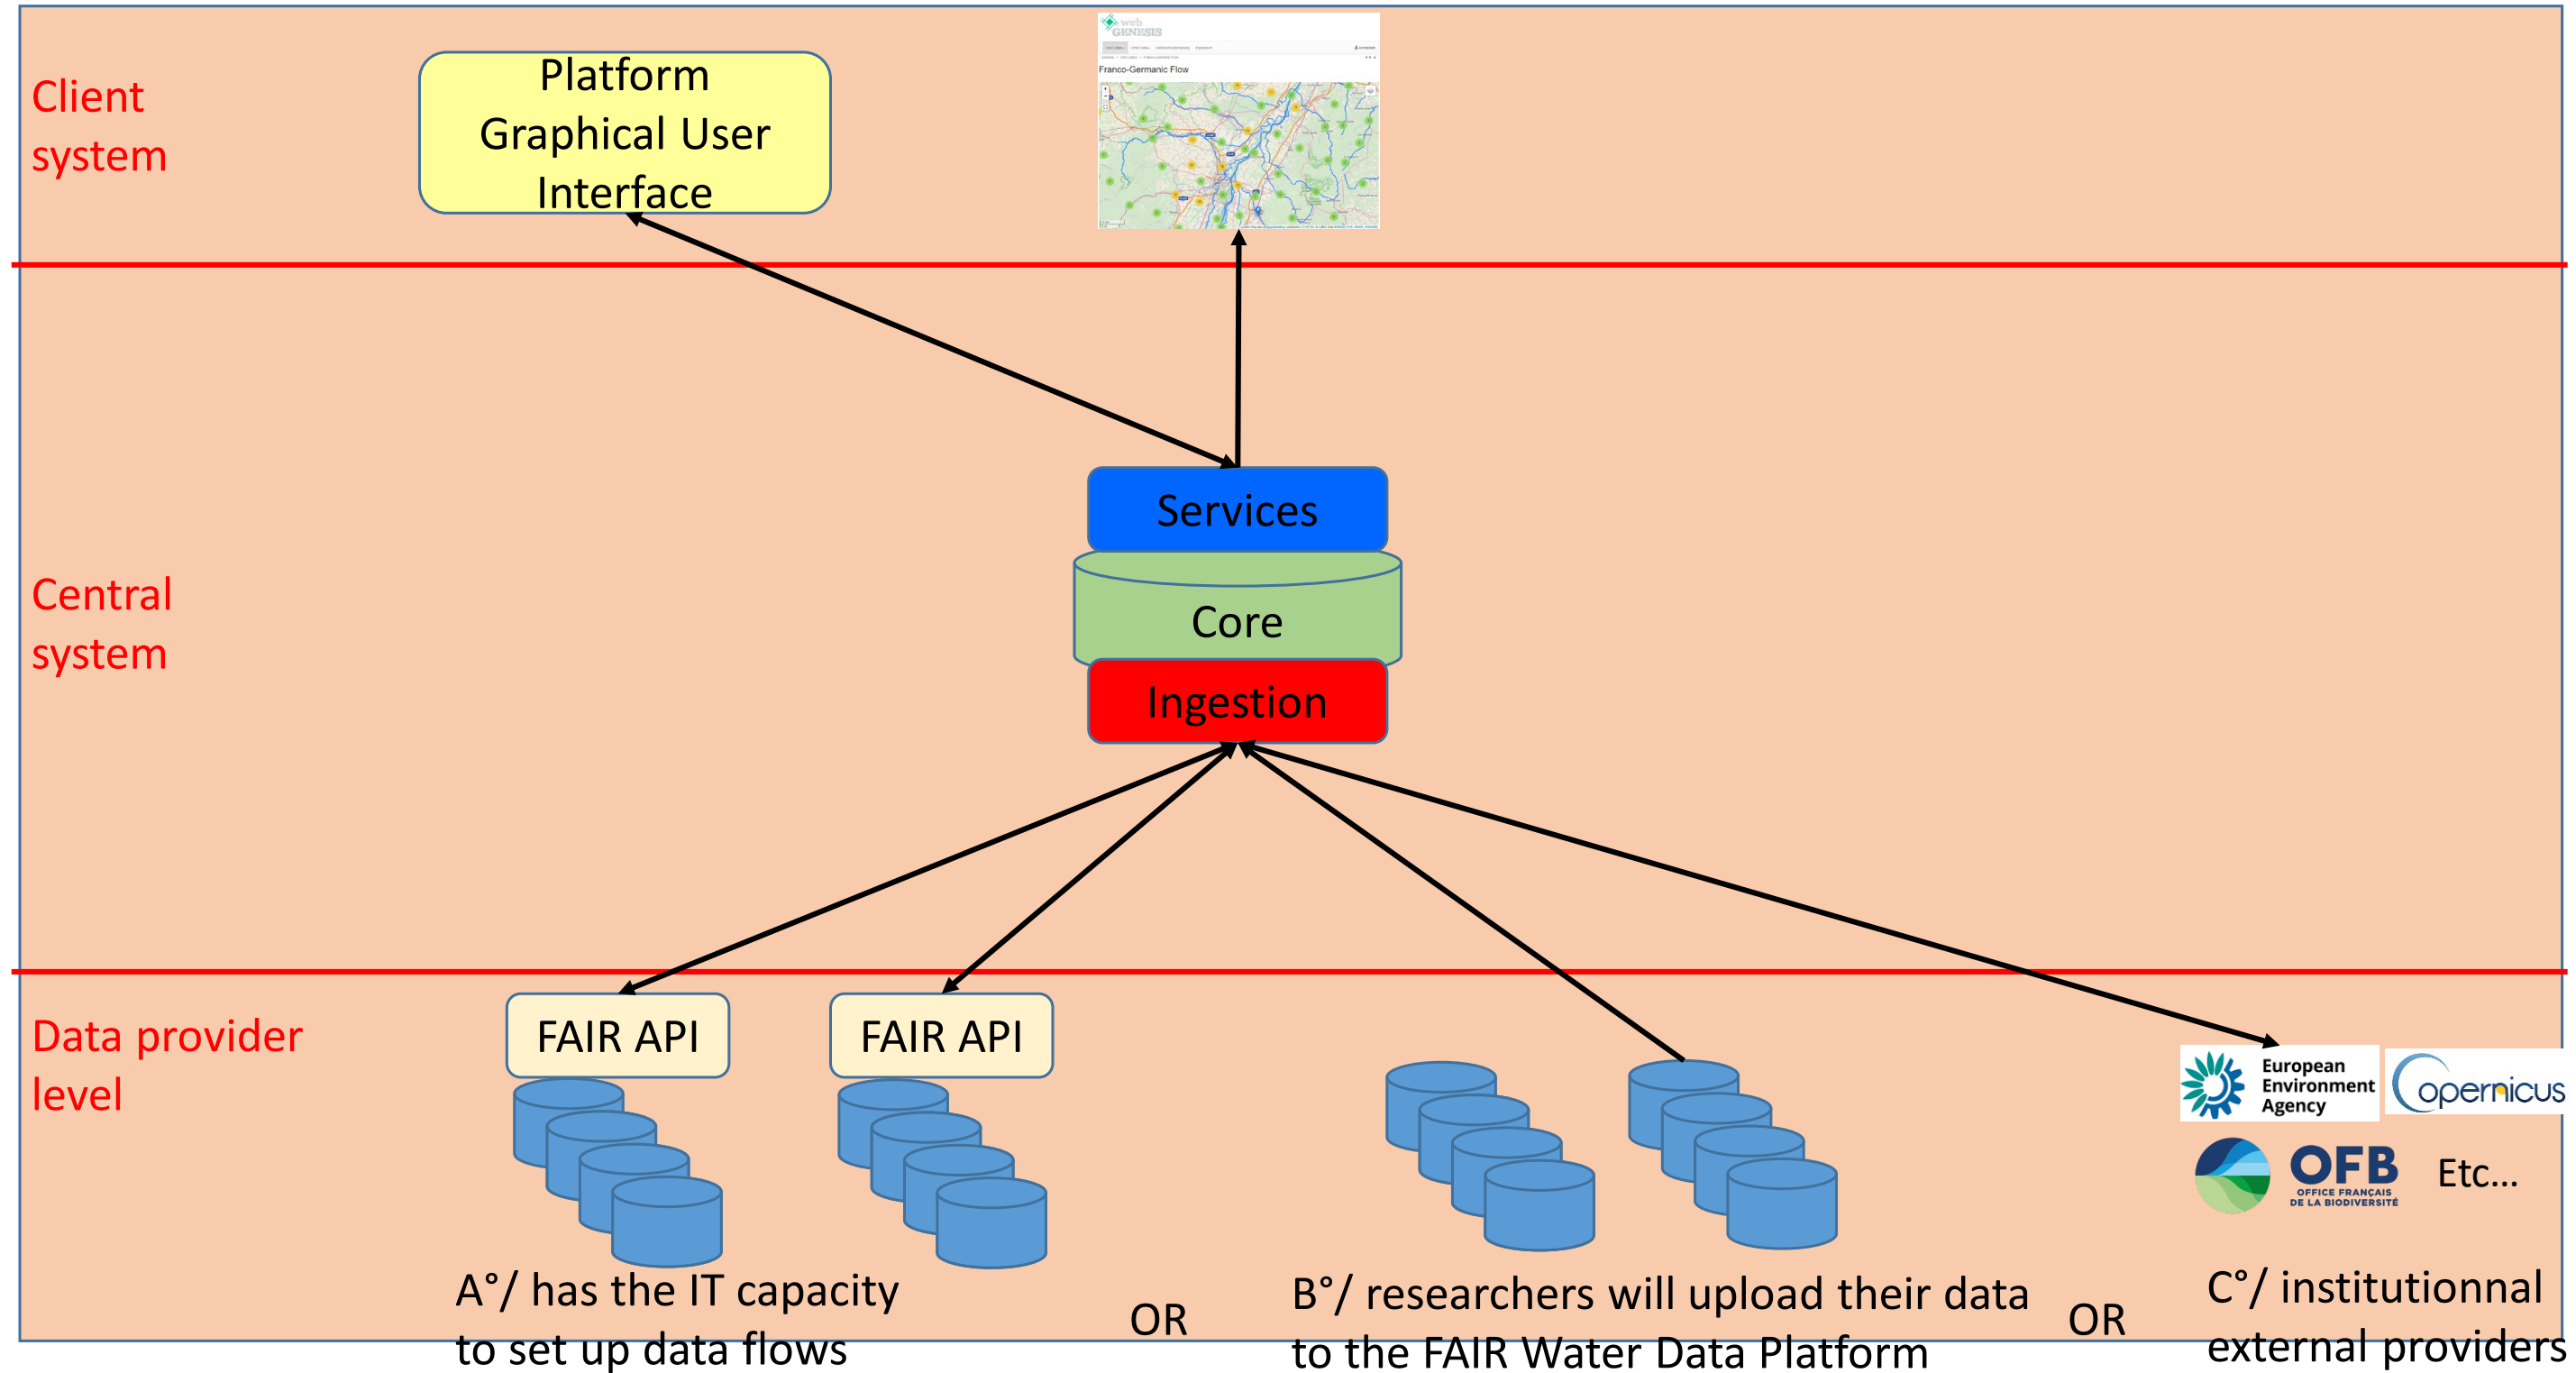

= a set of common practices

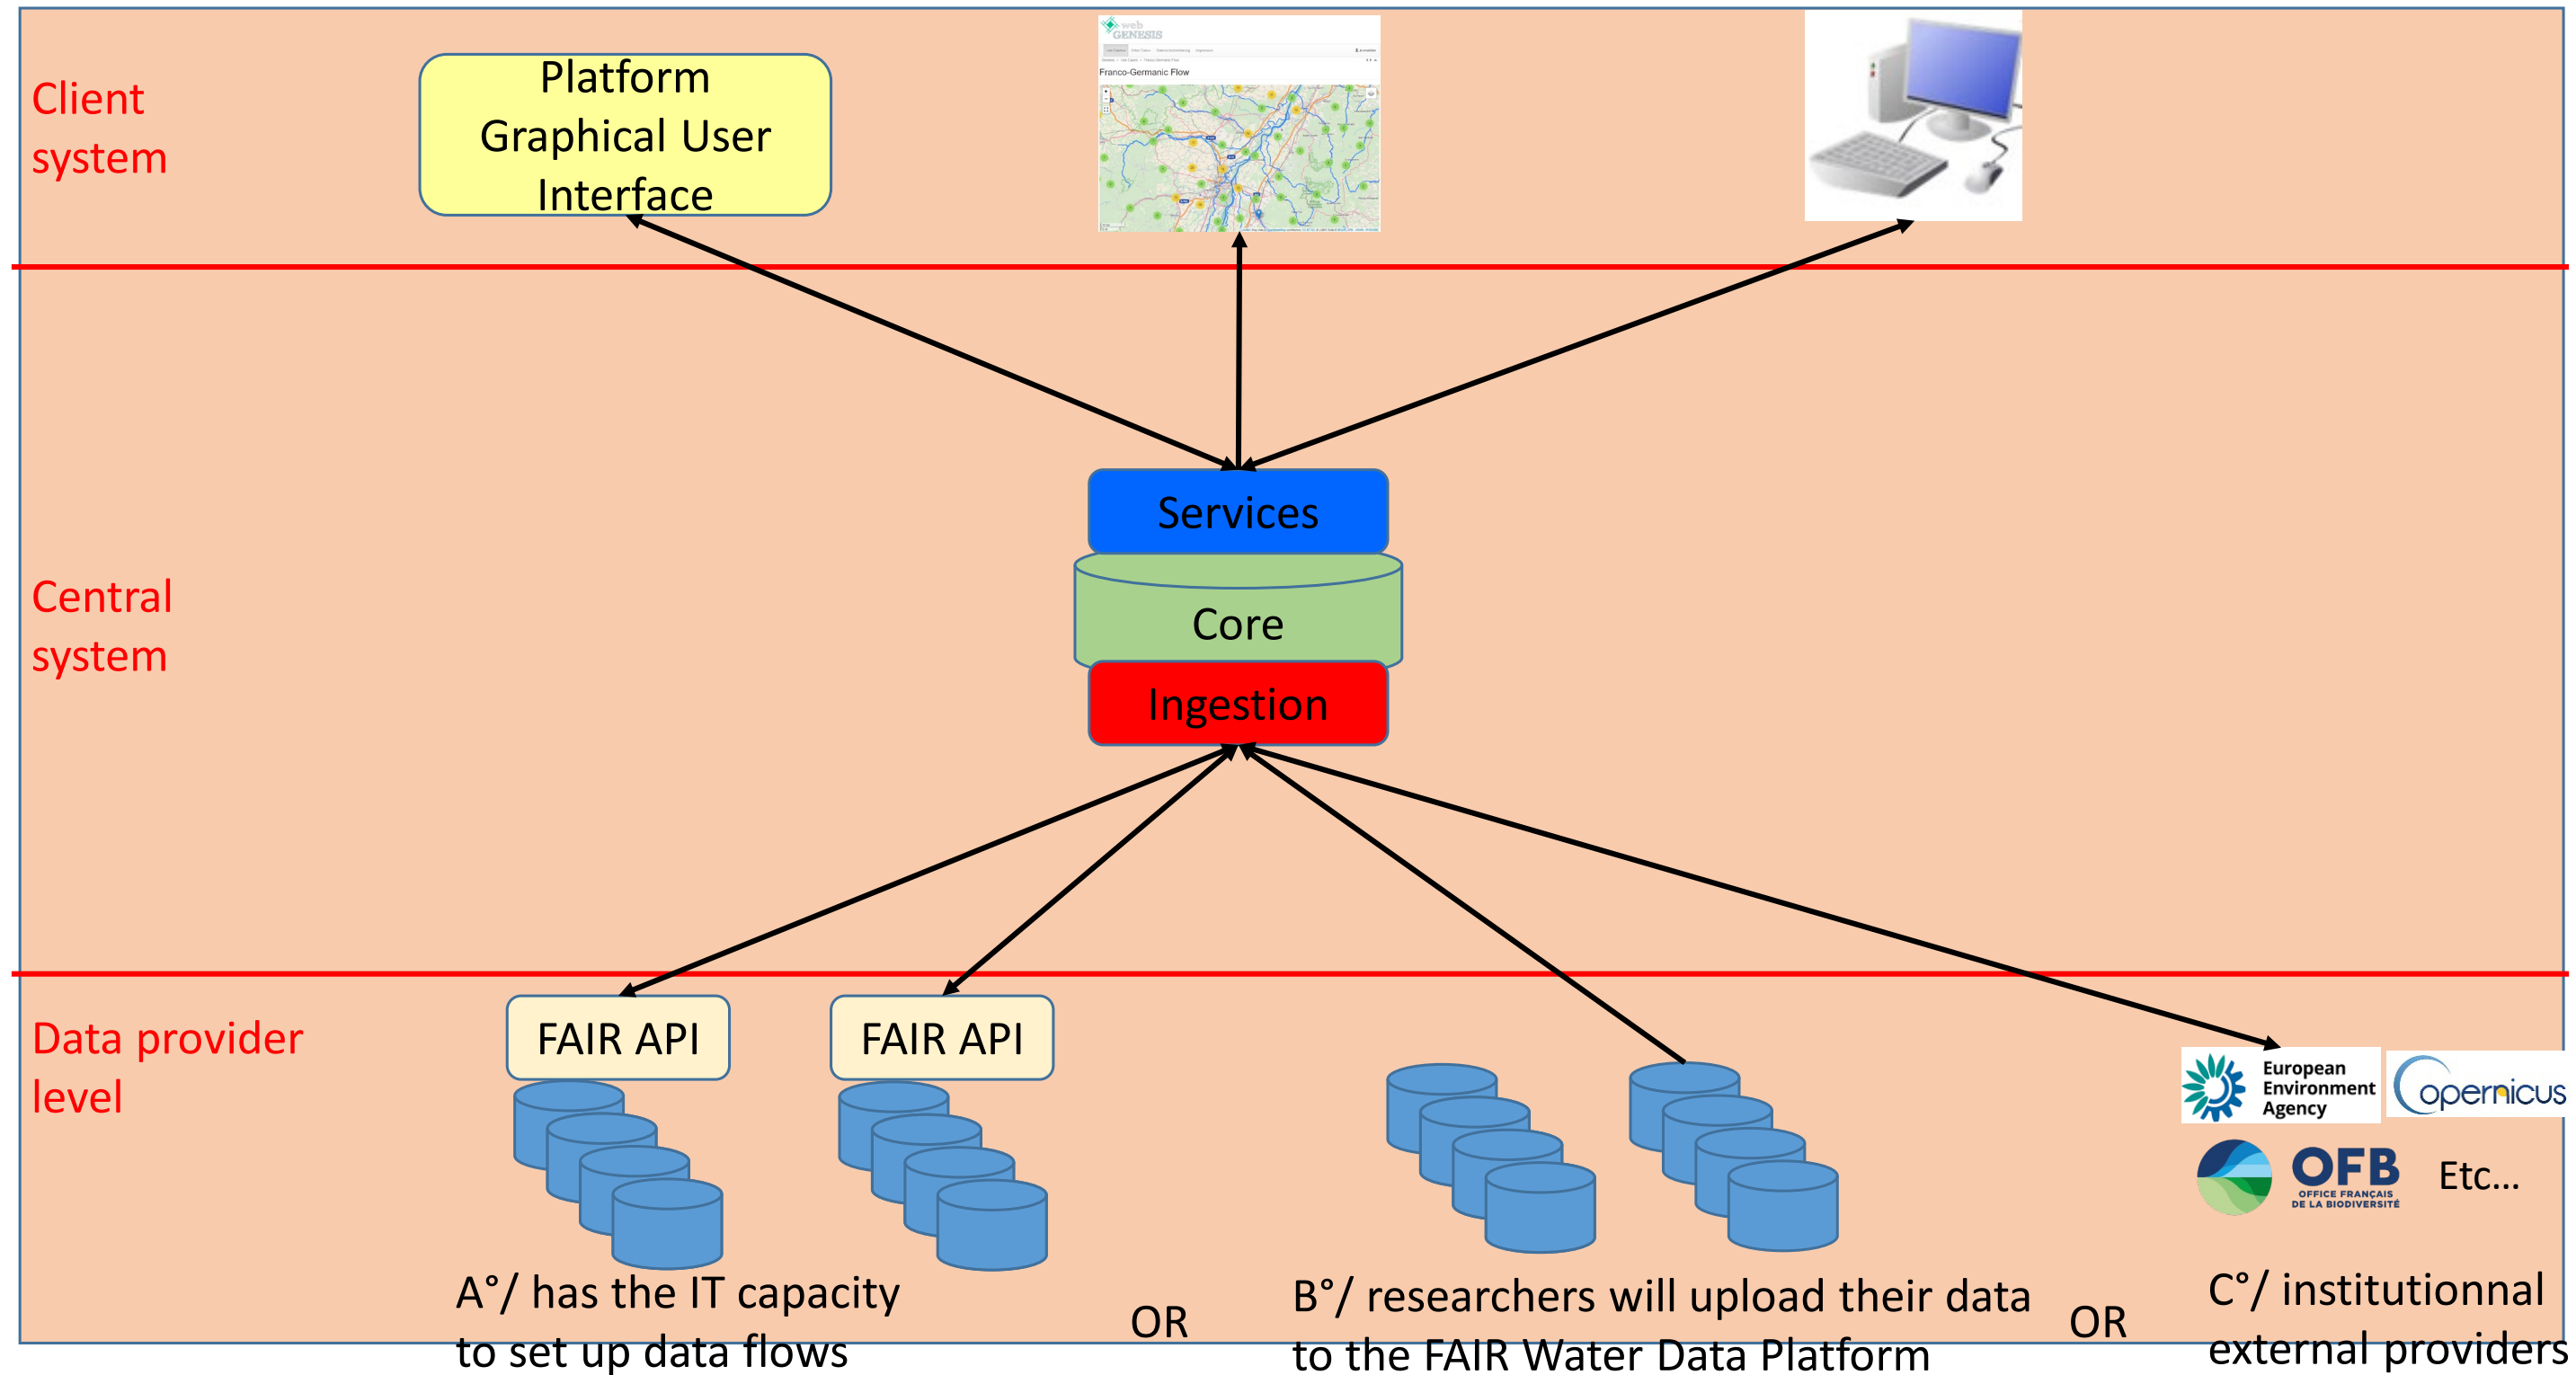

Common practices: specifications and FAIR Implementation Profiles

= a set of common practices + platform

= a set of common practices + platform + tools

* Data Management Plan

- Initial Use Cases to bootstrap the process

Surface Water Quantity

Ground Water Quantity

Surface Water Quality
(physico-chemical properties)

Ground Water Quality
(physico-chemical properties)

Reference hydro network

Reference hydrogeology

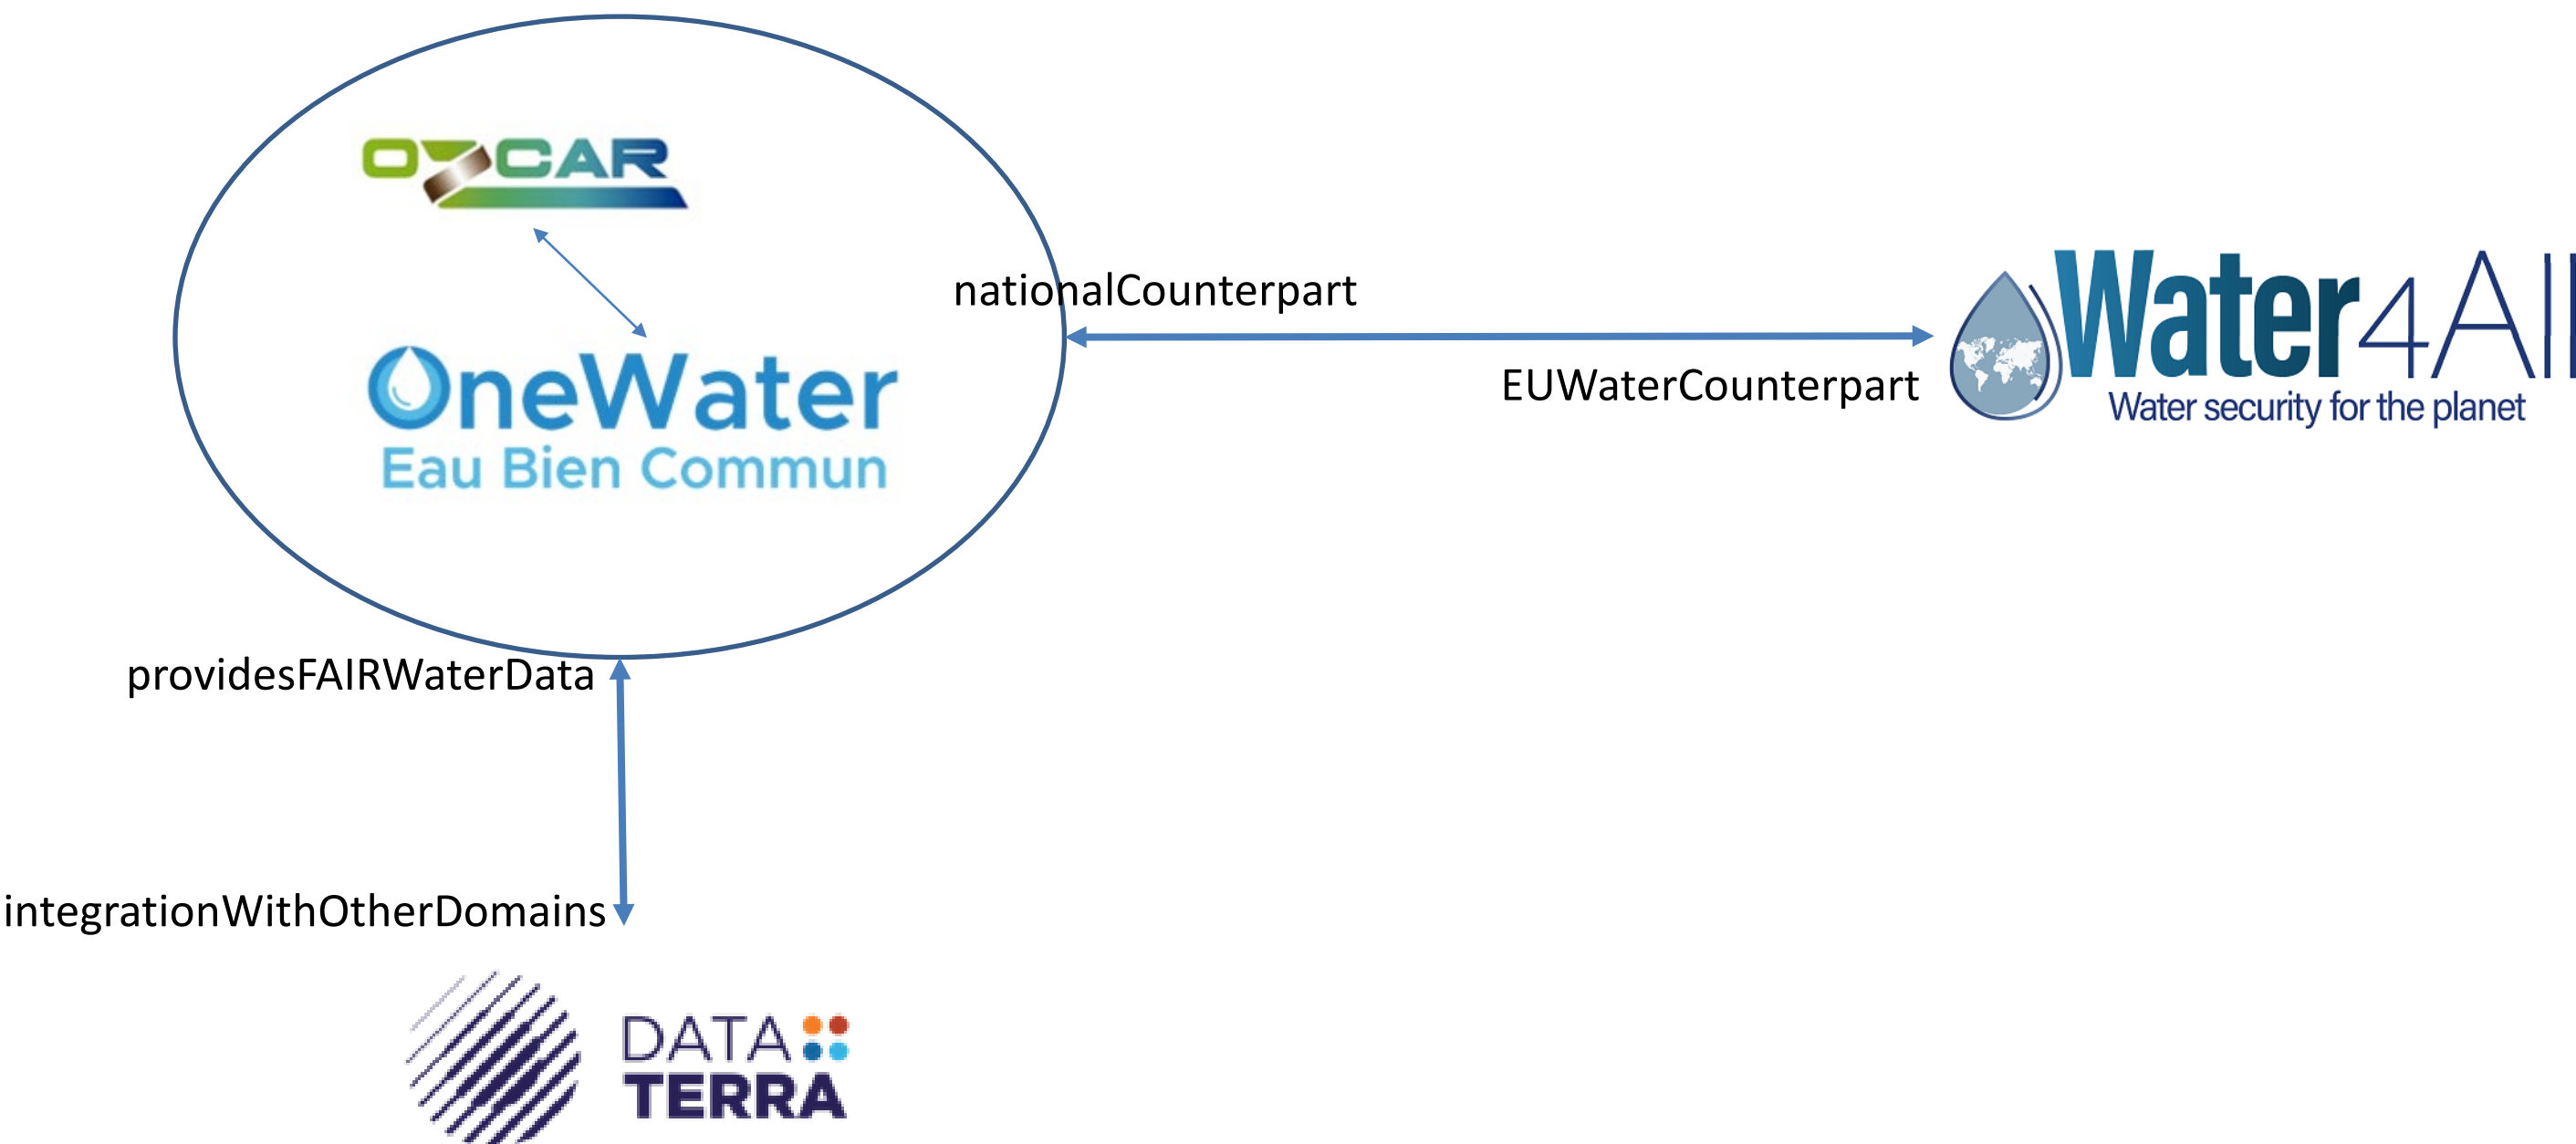

Vocabularies

Integration in the bigger puzzle

Synergies with other dynamics

Integration in the bigger puzzle

<https://www.water4all-partnership.eu/>

31 countries, 7 years

86 m€ for the 1st phase

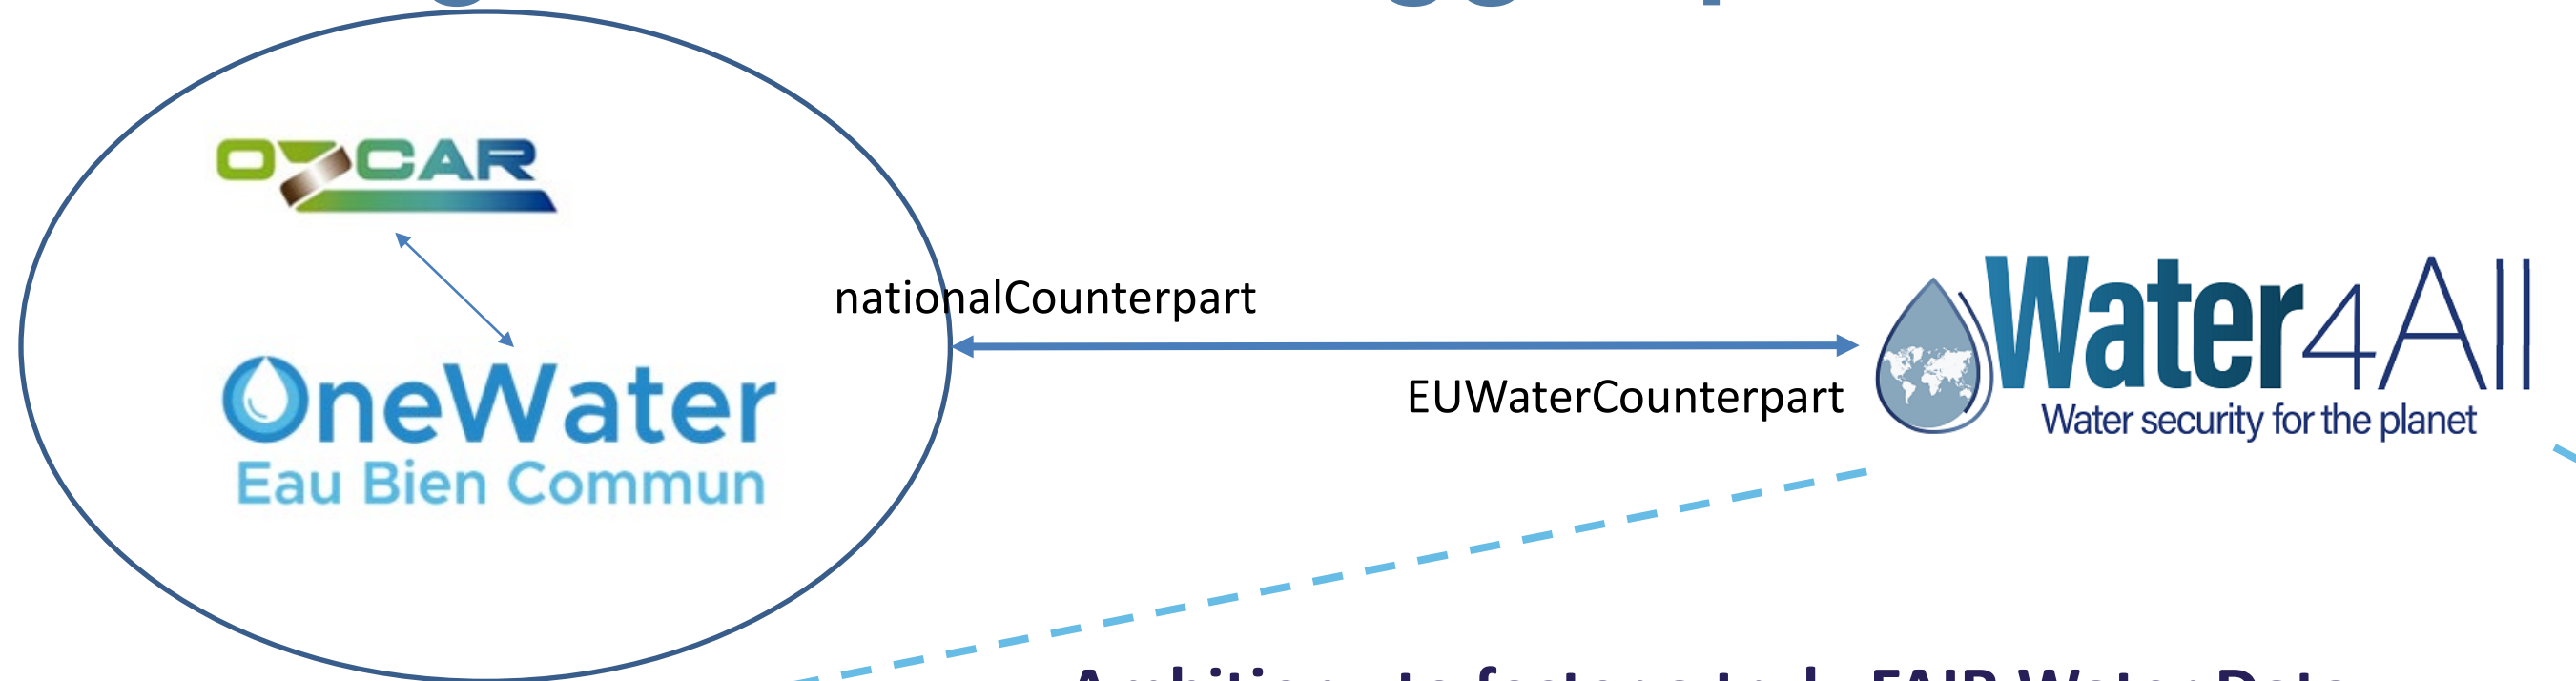

To tackle water challenges as means to face climate change, help to achieve the United Nations' Sustainable Development Goals and boost the EU's competitiveness and growth (EU Green Deal).

81 partners

- research and innovation funders,
- thematic authorities in charge of water issues and policy-makers,
- local authorities,
- associations and networks representing the economic sector in the field of water at the European, national or regional level,
- research organisations.

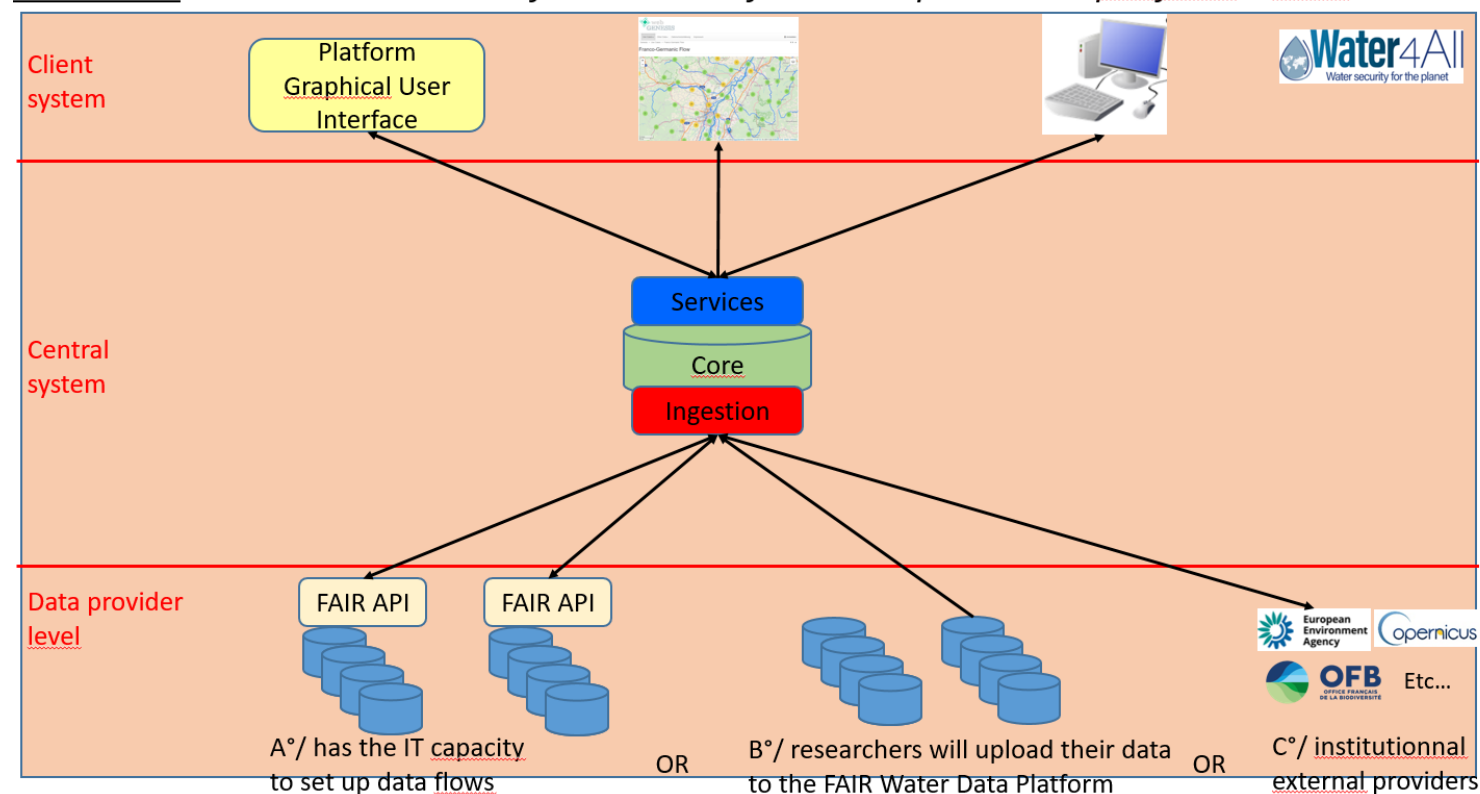

Integration in the bigger puzzle

Ambition : to foster a truly FAIR Water Data exchange in Europe via a FAIR Water Data Platform

Conclusion: FAIR Water Data Platform = a set of common practices + platform + tools

? Looks similar ?

Integration in the bigger puzzle

Partly shared teams (thus FAIR philosophy) and initial Use Cases

Surface Water Quantity

Ground Water Quantity

Surface Water Quality
(physico-chemical properties)

Ground Water Quality
(physico-chemical properties)

Reference hydro network

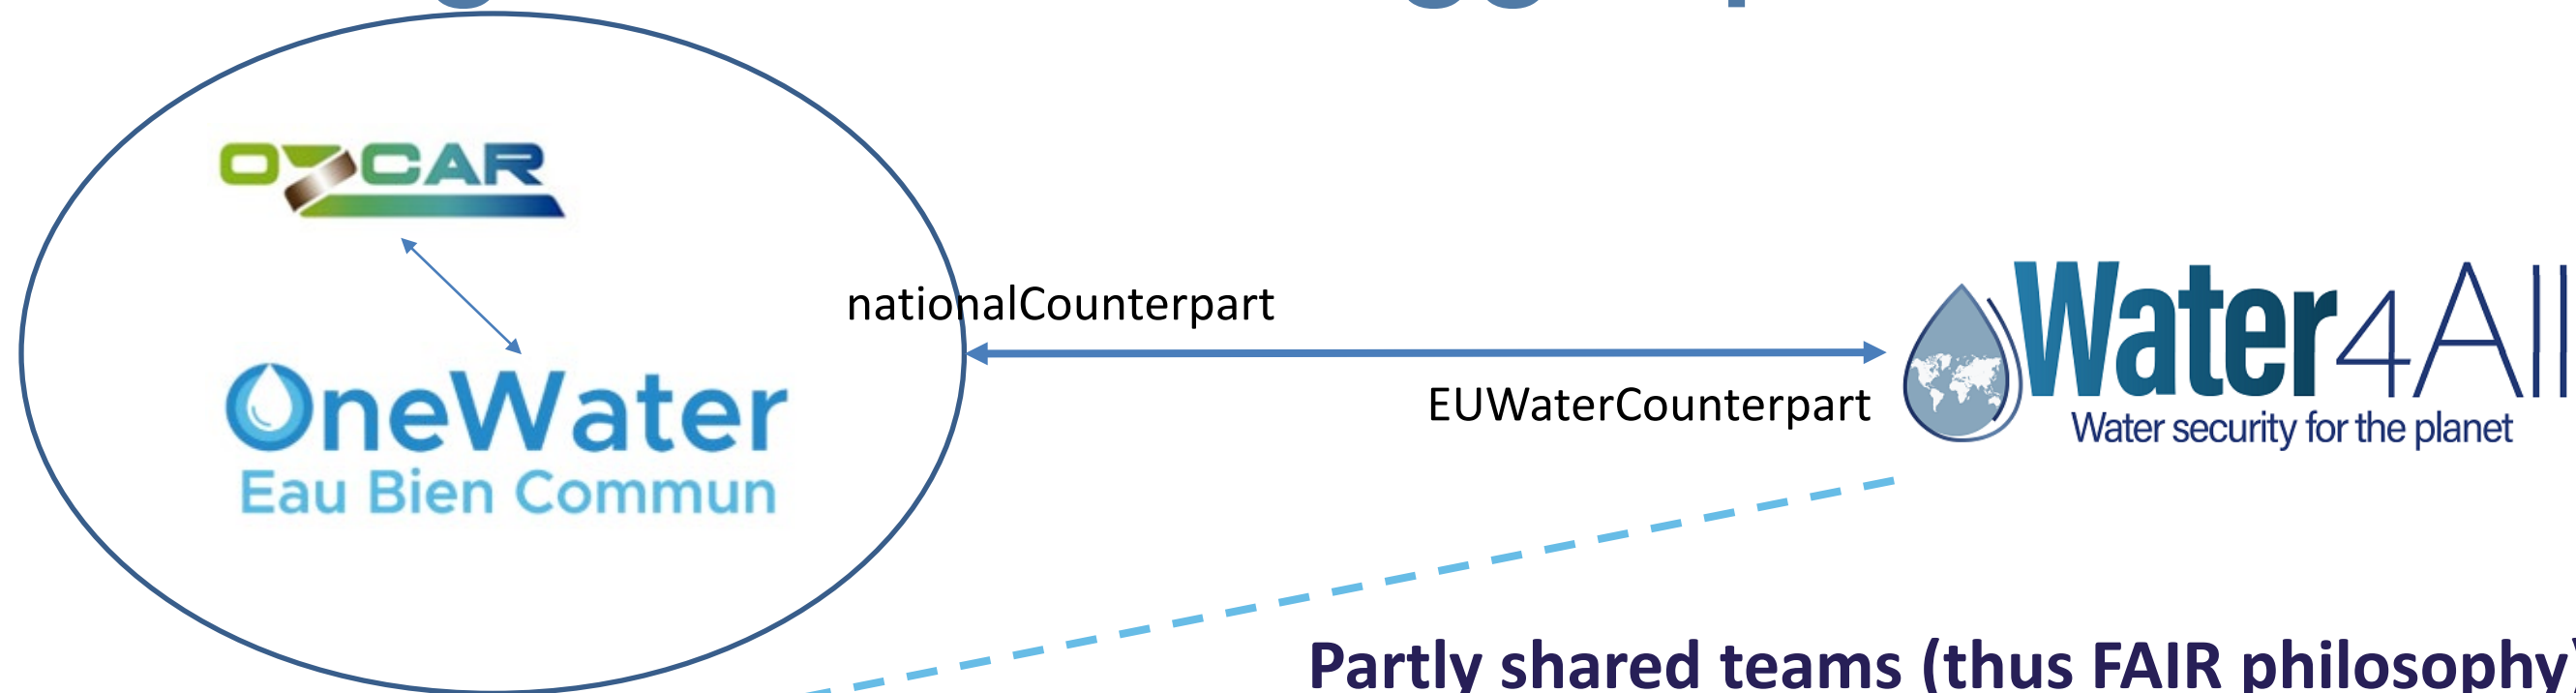

Reference hydrogeology

Vocabularies

Integration in the bigger puzzle

Partly shared teams (thus FAIR philosophy) and initial Use Cases

Surface Water Quantity

Ground Water Quantity

Surface Water Quality (physico-chemical properties)

Ground Water Quality (physico-chemical properties)

Reference hydro network

Reference hydrogeology

Vocabularies

= Those Use Cases are also already currently being handled in the OGC Water Quality Interoperability Experiment <https://github.com/opengeospatial/WaterQualityIE>

Integration in the bigger puzzle

Main mission → to develop a structure for accessing and processing data, products and services geared towards observing, understanding and predicting in an integrated manner the history, mechanisms and evolution of the Earth system in response to global changes.

- 26 research organization and partner university
- 30 Data and Services centers
- 32 Centers of scientific expertise
- 200 FTE / 450 scientists, engineers and technicians

provides FAIR Water Data

DATA TERRA, French research e-infrastructure focused on the Earth system and environment

integration With Other Domains

Integration in the bigger puzzle

provides FAIR Water Data

integration With Other Domains

DATA TERRA, French research e-infrastructure focused on the Earth system and environment

Integration in the bigger puzzle

provides FAIR Water Data

integration with other domains

Pôle de données

- AERIS Atmosphère
- FORMATER Terre Solide
- ODATIS Océan
- THEIA Surfaces continentales

Dispositif transverse images très haute résolution spatiale

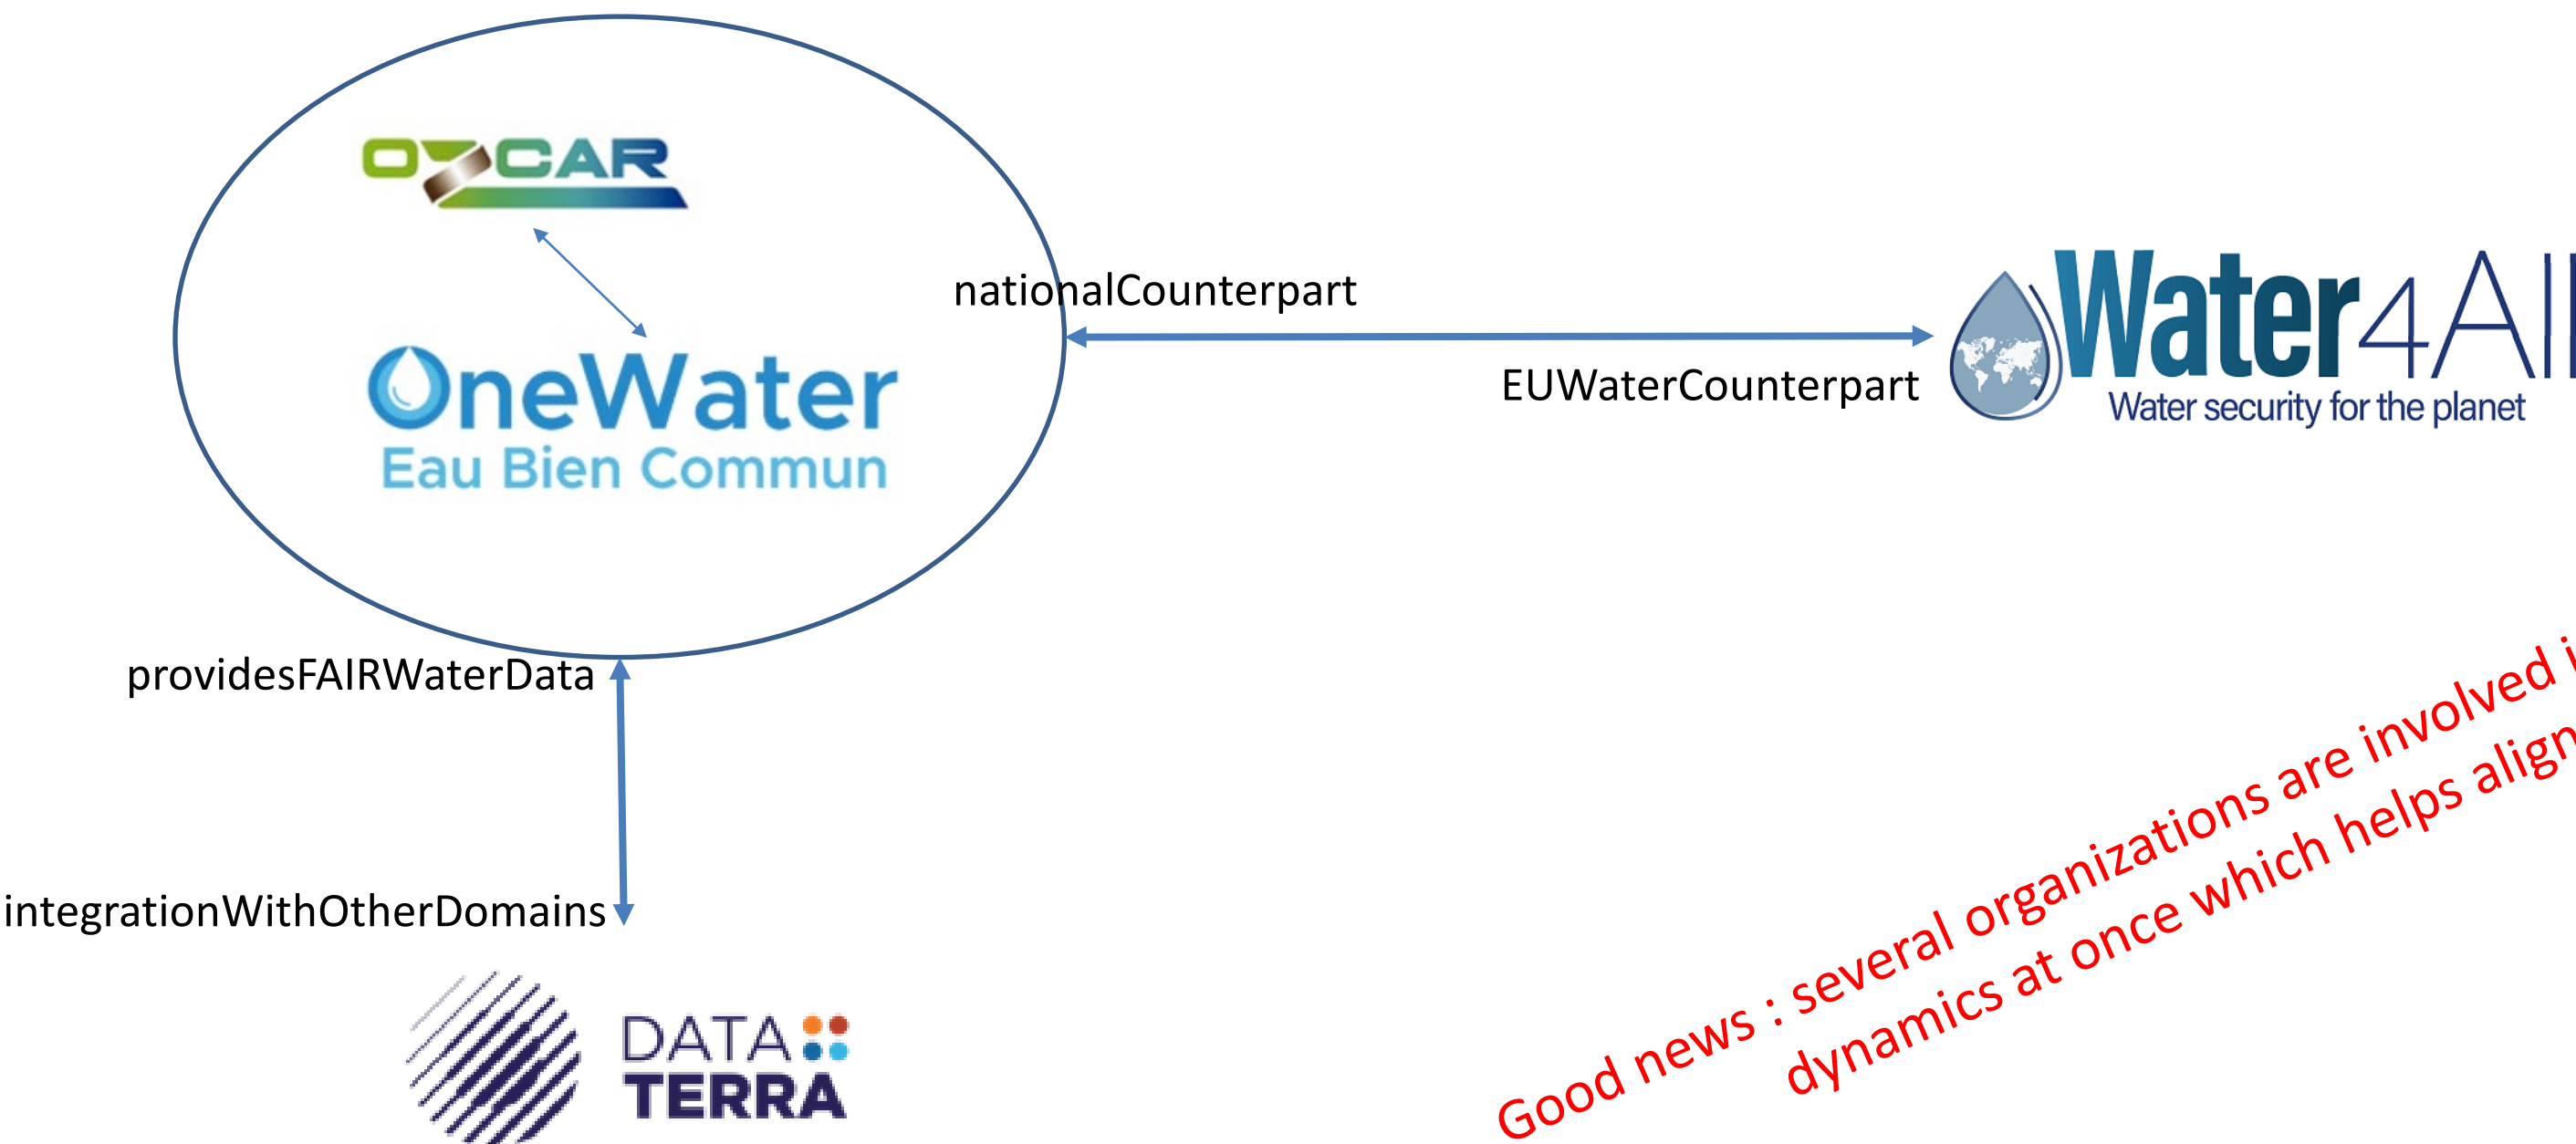

- DINAMIS

- Données Satellites
- Données In-situ

Integration in the bigger puzzle

Synergies with other dynamics

Good news : several organizations are involved in all those various dynamics at once which helps align planets

Conclusion

Quite an endeavor !

- However, all those dynamics
 - have decent time to work
 - build on
 - international FAIR practices
 - & open-source implementations

⇒ Better chance to contribute to the overall community

Thank you – OneWater Data Platform Team
